

Raspberry Pi 4 Acrylic Experimental Casing Ver1.0

PRODUCT INFORMATION

Designed by Autobotic Sdn Bhd
Product of Malaysia

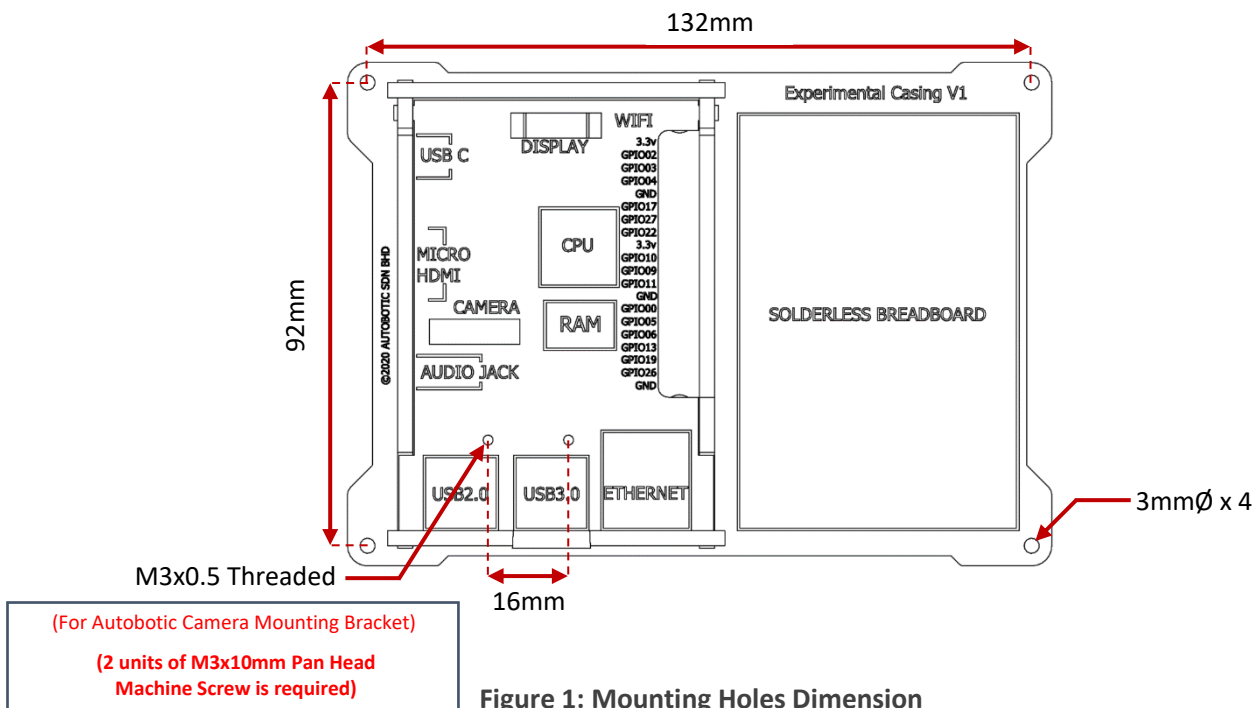

Product Description

Autobotic Raspberry Pi 4 Acrylic Experimental Casing has a snap-fit design that allows easy assembly. It is an educational casing with clear labels of on-board components of the raspberry pi for new raspberry pi users. The cover of the casing is movable for installation of a heatsink, camera module, fan, etc. The opening design above gpio pins allow users to perform quick prototyping with other sensors and actuators. The base plate is specifically designed to attach a half breadboard and provide 4 mounting holes. The mounting holes allow users to mount the casing vertically on the wall and other projects without worrying about the risk of damaging your raspberry pi board. There are 2 mounting holes on the cover specifically designed to mount our acrylic camera bracket.

Product Details

Overall Dimensions	:	140mm*100mm*27.5mm (W*L*H)
Thickness	:	3mm
Total Weight	:	77g
Material	:	Transparent Acrylic
